SIMON PERERA

Target Roles: Junior Software Engineer | Graduate Data Analyst | Service Desk Analyst | Entry Level IT Opportunities
Melbourne, VIC| Email: senuradp@gmail.com | Phone: 0433 946 491 | LinkedIn | GitHub

Full Australian work rights | Available immediately for full-time opportunities | Open to relocation within Australia

Professional Summary

Early-career software engineer and Master of Data Science graduate with over two years of professional experience across full-stack development, cloud infrastructure and deployment support. Proficient in Python, SQL, Java, PHP/Laravel, JavaScript, React and AWS, supported by practical machine learning, deep learning and explainable AI projects. Experienced across the software development lifecycle within Agile teams, including development, testing, debugging, CI/CD and technical documentation.

Open to Junior Software Engineer, Graduate Data Analyst, Service Desk Analyst or other entry-level IT opportunities where I can apply my software engineering and data science background, deliver value from day one, and continue building a long-term career in the Australian IT industry.

Technical Skills

Software Engineering	Python, Java, PHP, Laravel, JavaScript, React, Next.js, Nuxt.js, HTML, CSS, Bootstrap, REST APIs, OOP
Data Science & Analytics	Python, SQL, Pandas, machine learning, deep learning, statistical modelling, Bayesian methods, data wrangling, data visualisation, XAI, Jupyter
Cloud & DevOps	AWS EC2, AWS S3, Docker, Kubernetes, Git, GitHub, CI/CD, cloud hosting and storage configuration
Quality & Delivery	Agile, Scrum, SDLC, unit testing, integration testing, debugging, documentation, performance optimisation

Technical Projects

Intelligent IoT Data Management Platform | Deakin University Capstone Project *July 2026*

GitHub: DataBytes Organisation Repository

- Developed Python and Pandas-based analytical pipelines implementing rolling-window correlation analysis and correlation change alerts for IoT sensor streams within an Agile Capstone project.

Knee Osteoarthritis Detection Using Explainable AI | Python, Deep Learning *2024*

GitHub: Knee Osteoarthritis Detection Project

- Developed a deep learning-based medical imaging solution using CNN architectures and Explainable AI (XAI) techniques including Grad-CAM, LIME, and Integrated Gradients for knee osteoarthritis detection.
- Conducted and published an IEEE-standard review paper at the APIIT International Research Conference (AIRC) 2024, analysing the role of XAI techniques (Grad-CAM, LIME, SHAP) in improving transparency, interpretability, and trust in medical image analysis systems.

Java POS Client-Server System | Java, OOP *2023*

GitHub: Java POS Client Server System

- Developed a Java Swing-based client-server Point of Sale (POS) system implementing object-oriented design principles, transaction workflows, and desktop application functionality.

Professional Experience

Cashier & Sales Assistant - IGA Xpress | Australia *Oct 2024 – Present*

- Deliver customer service in a fast-paced retail environment, demonstrating strong communication, reliability and workload prioritisation.

Associate Software Engineer - Arimac Digital | Sri Lanka *May 2023 – Sept 2024*

- Delivered and maintained client-facing web applications using PHP (Laravel), JavaScript, SQL, and modern frontend technologies within Agile environments.
- Collaborated with cross-functional teams to drive debugging, testing, deployment support, and performance optimisation across the application lifecycle (SDLC).
- Configured and managed AWS cloud infrastructure including EC2-based web hosting, S3 cloud storage management, and Docker-based containerisation to support application deployment and environment configuration.
- Provided mentorship to interns while contributing to technical discussions and solution design across project delivery.

Intern Software Engineer - Arimac Digital | Sri Lanka *Nov 2022 – May 2023*

- Contributed to the development and testing of software applications using Laravel, JavaScript, SQL, and Git-based Agile workflows in a collaborative environment. Played a key role in debugging, documentation, quality assurance, and technical research across diverse development tasks.

Junior Developer (Remote) - EZ Marketing | Australia *Oct 2022 – Feb 2023*

(Concurrent with Intern Software Engineer role at Arimac Digital)

- Developed responsive WordPress websites and frontend enhancements using HTML, CSS, JavaScript, Bootstrap, and PHP. Assisted with client projects, UI improvements, and HubSpot email campaign integration within remote development environments.

Trainee Software Engineer - Brylix Online Solutions | Sri Lanka *Nov 2021 – Sept 2024*

(Part-time/contract role held concurrently with Arimac Digital and EZ Marketing positions)

- Developed and enhanced web applications using PHP/Laravel, Next.js, Nuxt.js and React, while supporting testing, quality assurance and technical documentation.
- Contributed to iOS and Android application development using Swift and Flutter.
- Supported AWS infrastructure, cloud hosting, storage management and Docker-based deployments across project environments.

Trainee Software Engineer - NBit | Sri Lanka *Nov 2020 – Aug 2021*

- Built hands-on experience in full-stack web development, focusing on debugging, testing, and frontend development using HTML, CSS, JavaScript, Bootstrap, and PHP.

Education

Master of Data Science - Deakin University (Burwood Campus) *Sept 2026*

- Advanced focus in Machine Learning, Deep Learning, Statistical Modelling, and Bayesian Methods.
- Built practical expertise in cloud-native applications and real-world data analytics.

BEng Software Engineering (First Class Honours) | APIIT Sri Lanka / Staffordshire University *Oct 2023*

- Enterprise cloud and distributed web applications, mobile development, clean coding, concurrent programming, databases, data structures, networking and cybersecurity.
